

multi-room wireless audio

Music everywhere
... without wires !

The Eos Converge Amplified Receiver

The Eos Converge Amplified Receiver let's you play all your music, all over your house and all you have to do connect your choice of speakers -- or choose the great sounding acoustically matched Eos Loudspeakers for a complete solution. With Eos Auto-Link, just turn the Eos Converge Amplified Receiver on and it's instantly part of your Eos Wireless System.

The Eos Converge Amplified Receiver features a premium-quality Class D amplifier that gives you uncompromised audiophile sound quality that's a perfect fit for every room environment. The Eos Converge Amplified Receiver is at home in any room of your house, or the perfect solution for powering outdoors speakers. There is even an auxiliary audio jack so you can connect an audio device like an iPod directly to the amp. Best of all, there is no complex mind bending set up, and no wireless Internet connection required.

With the Eos Converge Transmitter connected on a computer (with iTunes or other software based media player) the Eos Converge Amplified Receiver allows you to play/pause skip tracks forward or back -- or control your system remotely using an iPhone or iPod Touch and Apple's free Remote application.

All Eos products feature our legendary GigaWave wireless technology giving you the ability to broadcast interference-free music over 150ft -- through walls floors ceiling and doors, inside or out. Best of all Eos does not require a WiFi network or a mind-bending complex set up -- you just plug and the Eos system plays.
