

multi-room wireless audio  
**Music everywhere**  
 .... without wires !

## Eos Converge Receiver

The Eos Converge Receiver is extremely versatile...it lets you play all your music, all over your house, on the audio equipment that you already have — your home theatre receiver, stereo system, powered speakers, and more. With Eos Auto-Link, just turn the Eos Converge Receiver on and it's instantly part of your Eos Wireless System. The Eos Converge Receiver gives you uncompromised audiophile sound quality that is as good a wired solutions.

With the Eos Converge Transmitter connected on a computer (with iTunes or other software based media player) the Eos Converge Receiver allows you to play/pause skip tracks forward or back -- or control your system remotely using an iPhone or iPod Touch and Apple's free Remote application.

All Eos products feature our legendary GigaWave wireless technology giving you the ability to broadcast Wi-Fi friendly, interference-free music over 150ft -- through walls floors ceiling and doors, inside or out. Best of all Eos does not require a WiFi network or a mind-bending complex set up -- you just plug and the Eos system plays.
